

VINI – VIDI – VICI

(By S.Jaikumar and G. Natarajan. Advocates, Swamy Associates, Chennai)

What is the greatest invention on Earth? Wheel? Electricity?....No. For us its Language and Communication.

Language/ Communication has taken this mankind from the gravitational epicentre of this Mother Earth to the flamboyance of the Milky Way. This glorious World, we are living today is possible only because of this most spread-out invention.

Communication has traveled an eternal voyage from its evolution to the stage it is today. Pigeons were the primitive communicators. Then postmen. Landmark development in communication came when Sir Alexander Graham Bell made the telephone bell ring. Telegrams and Facsimiles followed. But after the world was taken over by the three-piece-suit wonder (Monitor, CPU, and Keyboard), the world has shrunk into a handful sphere. The revelations that the computer has brought to all walks of mankind are inseparable, undisputed and deep-rooted. Its enormous influence on the entire domain of human life has not spared communication. Infact, communication has been the crowning glory of computer vis-à-vis mankind.

When the term Internet was first introduced, no man would have thought that he is going to use it more than his heartbeats. This most powerful communication tool has been variantly used and has variety of usages.

All who hold a brush cannot be a Picasso. Only a few, use the Internet-the magician to the helm, of which our favo TaxindiaOnline.com(TIOL) is one among the very best. Three years before, nobody would have thought that this TIOL is going to make such an evergreen mark in the field of taxation. In its very colorful and successful journey along these years, TIOL has not only proved that it provides the most thought-matter-byte but also the most sought-after-site. Its average multi-lakh hits per-day is a testimony to its class, supreme and success. It is easy to kick-start but its very difficult to sustain in a race of today's demanding competence. The widening spectrum of coverage the TIOL portal hosts today on a rainbow of areas is awesome and undoubtedly a champion stuff.

TIOL'S flashes on the latest updates match nothing less than Schumaccher's Ferrari on speed, Ramanujan's algebra on precision, Bhagatsingh on conviction and Mother Theresa on dedication. Romans say about Julius Caesar that "Vini, Vidi, Vici". Similarly TIOL came, saw and conquered us.

Lord Tennyson said, "More things are wrought by prayer". We take this grant big occasion – the third year anniversary celebrations of TIOL – to pray and wish my dearest TIOL a never-ending growth and everlasting voyage into the galaxies of repute and success.
